Company History

Concrete Preparation was founded in 1991. Our corporate headquarters and 6,000 square foot warehouse are in Lodi, New Jersey, which is centrally located to the tri-state area region.

We currently employ forty employees. Our professional office and estimating staff are on hand at all times. We also retain a fully equipped fleet of vehicles including 10 vans and two Mitsubishi FE 639 box trucks. **In addition we have a new 24 foot Hino box truck with a 125kw electric generator built in.** This self-contained unit allows work to be completed in a timely manner with virtually zero downtime due to a power shortage on site.

In addition to all other accoutrements needed to provide a quality installation, our major on site floor preparation equipment includes:

Equipment:

- (8) Shotblasters, Including a 20" Machine
- (15) Scarifiers
- (12) Power Trowels
- (17) Floor Buffers
- (45) Chipping Guns
- (45) Dust Free Diamond Grinders

Concrete Staining

Transparent Concrete Stain, 100% Acrylic Penetrating Finish. Take advantage of the unique variations of color, texture and porosity of each different concrete surface.

It's designed to accent those variations with the same kind of beautiful multi-hued appearance found in many **natural stone surface**.

Perfect for concrete floors, patios, sidewalks, driveways, garage floors and more!
